Summary

I am a software developer focusing on front-end development. Tools I commonly use include Html, CSS(Bootstrap, Material UI, Tailwind.css, Ant Design), Javascript, React.js, Typescript, Next.js, Redux, and Git but most importantly, I am confident in my ability to learn and adapt to what my team needs. I currently work at Global Tote building interfaces to display data in an organized, user-friendly manner while working with other developers in an agile environment.

Check out applications I developed @ <https://nsikan-portfolio.vercel.app/>.
