## Summary

I am a software developer focusing on front-end development. Tools I commonly use include Html, Css, Bootstrap, Tailwind.css, Javascript, React.js, Next.js, and Git/GitHub but most importantly, I am confident in my ability to learn and adapt to what my team needs.
Check out applications I developed @ https://nsikan-portfolio.vercel.app/.

Gwinnett Diner @ https://gwinnett-diner-v2.vercel.app/
This was the capstone project of my associate's degree at Gwinnett Technical College. It is an eCommerce site for a fictitious restaurant name Gwinnett Diner. I worked on a team of 8 students as a developer to complete this project. The project was made up of 4 sprints, so we met regularly to share how our portion of the application was developing. It is built with React.js, Tailwind.css, and Bootstrap,

CryptoTracker @ https://cryptocoins-tracker.vercel.app/
This is an application that takes displays useful information about the top crypto coins. It also includes many common features that add to the user experience. It is built using React.js and Tailwind.css.

Ramsey Investment Calculator @ https://ramsey-investment-calculator.vercel.app/
This is an application that calculates the estimated retirement savings of an individual based on user input. A chart is also generated to demonstrate when the user becomes a millionaire. It is built using React.js and Tailwind.css.

## Experience

### Project Manager - Intern
Digital Media House
Sep 2021 - Present (11 months +)
